MARCH 17 & 18
SEATTLE CENTER

Greening the 21st Century
2005 BUILT GREEN CONFERENCE

Thursday, March 17 CONFERENCE

KEYNOTE Nationally respected and renowned Montana builder Steve Loken, founder of the Center for Resourceful Building Technology

SESSIONS A full day of educational programs including site and stormwater, energy efficient construction and planning, integrated design, green materials, land-use regulations, using solar power, and case studies.

HANDS-ON Practical workshops include using biodiesel fuels, structural insulated panels (SIPs), rastra construction, strawbale and earthen plaster construction, using solar energy and rainwater collection

POSTERS Poster session reveals the designs behind Built Green projects, focusing on entries to the Seattle Built Green Design Competition

AWARDS Awards presentation followed by a reception for the winners of the Seattle Built Green Design Competition with cash prizes

EXPO The expo of more than 40 exhibitors provides a sampling of green products and services including flooring, structural insulated panels, energy-efficient lighting, energy-efficient appliances, water-conserving fixtures, long-life siding, recycled content products, reclaimed and salvage materials, decking, project photography, green lifestyles and much more
EXPO opens to the general public for free from 5:30 to 7:00 pm

SOLAR A solar energy traveling display shows how the sun's energy can be captured for use in homes, even in the cloudy Northwest!

CONFERENCE COSTS: \$115 Built Green Member
\$135 Non-Member
\$65 Student with Student ID
Includes continental breakfast, lunch and reception

Friday, March 18 GREEN HOMES TOUR

Tour begins at Environmental Home Center and visits at least four certified Built Green projects in Seattle. Builders and designers of the projects will be on-site to talk about innovative green features, installation intricacies, product performance and cost effectiveness.

TOUR COSTS: \$50 per person
Includes lunch and transportation
