

# The WaterSense New Homes Incentive Program Fact Sheet

---

## About the Incentive

**Cascade Water Alliance** and **Built Green** are excited to provide the **WaterSense New Homes Incentive Program**, which offers a **\$1,000** rebate to builders who construct homes that meet the following requirements:

- ❖ Single-family projects
- ❖ Located in Cascade Water Alliance's territory
- ❖ WaterSense New Homes certified
- ❖ Built Green 3-star certified or higher

**Please Note:** This incentive will be provided to builders for up to 50 single-family home construction projects. No single builder can receive more than ten rebates during 2015. The rebate will not be provided until both WaterSense New Homes and Built Green certification are met and verified.

## How to Obtain the Incentive

We want to make the process of achieving this incentive as administratively easy as possible. To enroll your project, submit to Built Green a Project Enrollment Form as well as the WaterSense Incentive Form which alerts Built Green you will be targeting both certifications.

Once both certifications have been issued, Built Green will provide Cascade Water Alliance with the necessary materials. Cascade Water Alliance will then issue the rebate to the builder. Built Green and Cascade will work together as partners to make this process easier for you.

## About the Partners

**WaterSense** is a national program sponsored by the U.S. Environmental Protection Agency that promotes water efficiency and enhances the market for water-friendly programs, products, and practices.

**Cascade Water Alliance** is a municipal corporation composed of seven cities and water districts that is a wholesale water provider. Cascade is also a WaterSense partner, offering various incentives under the program.

**Built Green** is an environmentally-friendly, non-profit, residential building program of the Master Builders Association of King and Snohomish Counties. Built Green offers green home certification, membership benefits, and education.
